Where international, state, and/or county boundaries coincide, the map shows

<sup>1</sup> A '\*' following a place name indicates that the place is coextensive with a MCD; A 'o' indicates that the place is also a false MCD; the false MCD name is not shown.

<sup>2</sup> This map shows tribal census tract boundaries and numbers within the subject entity; nontribal census tract boundaries are shown outside of the subject entity but without numbers. A tribal census tract is a type of census

tract defined within a federally recognized American Indian reservation or off-reservation trust land for the purpose of providing data based on an American Indian hierarchy rather than by state and county. Where reservations or off-reservation trust lands cross state or county boundaries, the same tribal census tract number may be assigned on both sides of the boundary, and, if so, constitute a single tribal census tract entity.

3 A \* \* \* following a block number indicates that the block number is repeated elsewhere in the block.
